

**1st Quarter Report
2018**

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

The following discussion and analysis is prepared by Management as of May 3, 2018 and should be read in conjunction with the unaudited condensed interim consolidated financial statements for the period ended March 31, 2018 ("financial statements for the period ended March 31, 2018"), as well as the audited consolidated financial statements for the year ended December 31, 2017 available on SEDAR at www.sedar.com. Star Diamond Corporation ("DIAM", or "the Company") prepared its financial statements for the period ended March 31, 2018 in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). All currency amounts are quoted in Canadian Dollars, unless otherwise stated.

Overview

Star Diamond Corporation is a Canadian natural resource company focused on exploring and developing Saskatchewan's diamond resources. In February, 2018, the Company announced that it had changed its name from Shore Gold Inc. to Star Diamond Corporation and its trading symbol on the Toronto Stock Exchange to "DIAM" (see News Release dated February 12, 2018). This new corporate name is in honour of the Star Kimberlite, located in the Fort à la Corne forest of Saskatchewan, Canada. It was the exploration and evaluation work completed on the Star Kimberlite, which demonstrated the significant quality, size and value of the contained diamond populations. These high value diamonds facilitated the consolidation and advancement of the Company's Fort à la Corne area kimberlites, including the Star - Orion South Diamond Project. As a result of the 2017 mineral property consolidation and earn-in agreement (as discussed below), the Company is now in an enhanced position to advance its 100% held Star - Orion South Diamond Project ("Project").

The Company recently announced the positive results of the independent Preliminary Economic Assessment ("PEA") on the Project. The PEA estimates that 66 million carats of diamonds could be recovered in a surface mine over a 38-year Project life, with a Net Present Value ("NPV") (7%) of \$2.0 billion after tax, an Internal Rate of Return ("IRR") of 19% and an after-tax payback period of 3.4 years after the commencement of diamond production (see News Release dated April 16, 2018). The PEA was led by independent mining, processing and design consultants, with support from the Company's technical team. The PEA cash flow model is based on developing two open pits, initially on the Orion South Kimberlite and subsequently on Star Kimberlite.

The PEA Highlights include ¹:

- Total potential plant feed of 470 million tonnes at a weighted average grade of 14 carats per hundred tonnes ("cpht"), containing 66 million carats over the 34 year Life of Mine ² ("LOM");
- The Base Case scenario (Model diamond price) has an NPV (7%) of \$3.3 billion and an IRR of 22% before taxes and royalties, and an after-taxes and royalties NPV (7%) of \$2.0 billion with an IRR of 19%;
- The Case 1 scenario (High Model diamond price) has an NPV (7%) of \$5.4 billion for an IRR of 32% before taxes and royalties;
- Pre-production capital cost of \$1.41 billion with a total capital cost of \$1.87 billion (including direct, indirect costs and contingency) over the LOM and an initial capital cost payback period of 3.4 years.

¹ Cautionary note: The PEA was prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). Readers are cautioned that the PEA is preliminary in nature and includes the use of Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that the results of the PEA will be realized.

² Diamond-bearing kimberlite is produced from the mine and diamonds are recovered in the processing plant for 34 years. The overall project life is 38 years, which includes just over four years of pre-stripping activities.

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

Consolidation of the Fort à la Corne mineral properties (including the Project) and Option to Joint Venture

In June 2017, the Company announced that it had acquired (the "Newmont Acquisition") from Newmont Canada FN Holdings ULC ("Newmont") all of Newmont's participating interest in the Fort à la Corne joint venture (the "FalC JV"), resulting in the Company owning 100% of the Fort à la Corne mineral properties (including the Project), and concurrently entered into an Option to Joint Venture Agreement (the "Option Agreement") with Rio Tinto Exploration Canada Inc. ("RTEC") pursuant to which the Company has granted RTEC an option to earn up to a 60% interest in the Fort à la Corne mineral properties (including the Project) on the terms and conditions contained in the Option Agreement (see News Release dated June 23, 2017). Immediately after the closing of the Newmont Acquisition and issuance of common shares, Newmont held approximately 19.9% of the Company's common shares issued and outstanding on a non-diluted basis.

Activities relating to the Star - Orion South Diamond Project

During the fourth quarter of 2017, the Company and RTEC announced the completion of an HQ core drilling program, consisting of ten holes and some 2,409 metres of drilling, on the Star Kimberlite (See News Releases dated October 12, 2017 and December 11, 2017). In conjunction with this diamond drill program, geotechnical investigations on the overburden were also conducted (See News Release dated January 8, 2018). The core drilling was required to accurately document the internal stratigraphy of the Star Kimberlite prior to a proposed sampling program by RTEC, which is expected to commence in 2018. The Sonic drilling investigation of the overburden above the kimberlite was also an important precursor to a proposed sampling program. The Sonic drill hole locations were in close proximity to the core holes, which will act as pilot holes for the proposed sampling program.

RTEC, Bauer Maschinen GmbH ("Bauer") and Nuna Logistics Limited recently finalized contractual arrangements for the manufacture, supply and operation of equipment to be used for the next phase of large diameter, bulk sample drilling on the Star Kimberlite (See News Release dated April 12, 2018). RTEC aim to use a Bauer BC 50 Cutter mounted on a Bauer MC 128 Duty-cycle Crane to drill and sample to depths of up to 250 metres below surface. Each ten metres of advance down hole aims to excavate some 100 tonnes of kimberlite. Bauer cutter rigs are used around the world for complex engineering projects. Bauer has indicated that this will be the first time in the world that this technology will be used in an active project to reach a depth of 250 meters. Bauer has committed to build and deliver the equipment to RTEC by mid-2018 with drilling of RTEC's program to commence this year.

The Company has also performed geotechnical investigations, assessments and test work on the Project kimberlites. The work completed during this period included X-ray Transmission ("XRT") recovery of diamonds from Star pyroclastic kimberlite, ore processing data review, diamond parcel characterization, kimberlite particle size analysis and overburden removal investigations (See News Release dated March 6, 2017). These programs also investigate the use of new technology for the efficient excavation of the open pit and improvements to the flow-sheet of the diamond processing plant, while simultaneously reducing pre-production capital costs and the time to initial diamond production.

In January 2017, the Company was informed by the Saskatchewan Minister of Environment that additional consultation is required for the government to meet its legal obligation with respect to duty to consult and accommodate process (See News Release dated January 26, 2017). The Ministry has indicated to the Company that significant progress on meeting its duty to consult obligations has been made and that once consultations with potentially impacted First Nation and Métis communities are completed, all pertinent

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

information will be reviewed before a decision is made under The Environmental Assessment Act. The Canadian Environmental Assessment Agency previously announced an Environmental Assessment Decision for the proposed Project in which the federal Environment Minister indicated that the Project "is not likely to cause significant adverse environmental effects when the mitigation measures described in the Comprehensive Study Report are taken into account" (See News Release dated December 3, 2014).

Financial Highlights

Selected financial information of the Company for quarters ended March 31, 2018 and 2017 is summarized as follows:

	Three months ended March 31, 2018	Three months ended March 31, 2017
	\$	\$
Net loss (millions)	0.7	0.9
Net loss per share ⁽¹⁾	0.00	0.00
Total assets (millions) ⁽²⁾	71.1	3.8
Total non-current liabilities (millions) ⁽³⁾	1.3	0.6
Working capital (millions)	3.2	2.1

(1) Basic and diluted.

(2) Total assets as at March 31, 2018 include the effects of the Newmont Acquisition and the partial reversal of previously recorded impairments relating to the Company's Fort à la Corne mineral properties during 2017.

(3) Total non-current liabilities are comprised of environmental rehabilitation provisions (for which the Company has provided letters of credit, backed by short-term securities that are recorded on the Company's financial statements as restricted cash). At March 31, 2018, non-current liabilities also included contingent consideration relating to the Newmont Acquisition. The discounted present value of this contingent consideration at March 31, 2018 was \$0.7 million.

Results of Operations

For the quarter ended March 31, 2018, the Company recorded net loss of \$0.7 million or \$0.00 per share (basic and fully diluted) compared to a net loss of \$0.9 million or \$0.00 per share for the same period in 2017. The losses during these quarters were due to operating costs and exploration and evaluation expenditures incurred by the Company exceeding interest income earned on cash and cash equivalents and short-term investments.

Interest and other income

For the quarters ended March 31, 2018 and 2017 the Company reported interest and other income of \$42 thousand and \$9 thousand respectively. The Company invests excess cash reserves in interest bearing short-term deposits while ensuring funds would be available for cash outflow requirements associated with the Company's exploration and evaluation projects. Other revenue is measured at the fair value of the consideration received or receivable for goods and services in the normal course of business.

Expenses

Expenses incurred during the quarter ended March 31, 2018 were \$0.8 million compared to \$0.9 million for the same period in 2017, primarily due to lower administrative expenditures incurred. These amounts also include \$59 thousand of share-based payments that was expensed during the quarter ended March 31, 2018 (2017 – \$76 thousand).

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

 For the three months ended March 31, 2018

Exploration and evaluation expenditures were \$0.4 million for the first quarter of 2018 compared to \$0.4 million for the quarter ended March 31, 2017. Exploration and evaluation expenditures incurred during the quarters ended March 31, 2018 and 2017 were primarily related to work relating to geotechnical investigations and test work for the Project.

Administration, consulting and professional fees, and corporate development expenditures for the quarter ended March 31, 2018 decreased by \$0.1 million from the same period in 2017 to \$0.4 million. This decrease was primarily due to lower compensation costs incurred.

Premium on flow-through shares

The Company issued flow-through shares during 2016 and 2017 for a premium over the market value of the shares. The premium over the market value of the shares is recognized as a liability until such time as the Company incurs qualifying expenditures. As the Company incurs qualifying expenditures in 2018, this liability to the investor is satisfied and accordingly the premium received on the initial issue of share capital will be recognized in income. As at March 31, 2018 this premium was \$175 thousand (December 31, 2017 - \$237 thousand).

Use of proceeds

During 2017, the Company raised \$1.5 million from flow-through financing activities to be used on exploration and evaluation activities before the end of 2018. The Company expects that exploration and evaluation expenditures to be incurred in 2018 will fulfill its obligations under its flow-through commitments.

Flow-through proceeds raised during 2017	\$ 1.5
Flow-through expenditures incurred to March 31, 2018	0.4
Flow-through expenditures to be incurred by December 31, 2018	\$ 1.1

The Company expects that the exploration and evaluation expenditures incurred in 2018 will approximate the \$1.5 million flow-through financing raised during 2017.

Investment in Wescan Goldfields Inc.

At March 31, 2018, the Company held 5.8 million shares or 13.1% (December 31, 2017 – 5.8 million shares) of Wescan Goldfields Inc. ("Wescan"), a publicly traded company on the TSX Venture exchange. The Company considers certain judgments and assumptions when assessing whether significant influence exists over its investments. This includes an assessment of the Company's ability to participate in financial and operating policy decisions of the investee. The existence and effect of potential voting rights held by the investor or other entities were also considered. The fair value of this investment, based on the closing trading price at March 31, 2018, was \$406 thousand (December 31, 2017 – \$348 thousand).

Financing

No financing activities occurred during the quarters ended March 31, 2018 and March 31, 2017. During the quarters ended March 31, 2018 and 2017 the Company issued common shares from treasury as a result of vested restricted share units ("RSUs") and deferred share units ("DSUs") that were redeemed.

Summary of Quarterly Results

	2018	2017				2016		
	Qtr 1	Qtr 4	Qtr 3	Qtr 2	Qtr 1	Qtr 4	Qtr 3	Qtr 2
Income ⁽¹⁾ (\$millions)	0.0	0.1	0.0	0.0	0.0	0.0	0.0	0.0
Net income (loss) ⁽²⁾ (\$millions)	(0.7)	(0.8)	(0.5)	43.0	(0.9)	(1.0)	(1.1)	(1.9)
Net income (loss) per share ⁽³⁾ (\$)	0.00	0.00	0.00	0.12	0.00	(0.00)	(0.00)	(0.01)
Shares outstanding (millions) ⁽⁴⁾	379.9	378.3	361.0	356.4	295.3	294.0	282.4	275.6

(1) Income relates to revenue for services provided as well as interest earned on the Company's cash and short-term investments.

(2) Net income during the second quarter of 2017 was due to the reversal of previously recorded impairments to exploration and evaluation assets. Net losses for other periods relate to expenditures incurred by the Company exceeding income earned.

(3) Basic and diluted.

(4) During the fourth quarter of 2017, the Company completed a private placement of 17.3 million shares of the Company. During the third quarter of 2017, the Company issued 2.3 million common shares issued from treasury pursuant to an agreement with a third-party consulting and professional service provider. During the second quarter of 2017, 59.3 million shares of the Company were issued as a result of the Newmont Acquisition and Option Agreement. During the fourth quarter of 2016, the Company completed a private placement of 11.6 million shares of the Company. During the third quarter of 2016, the Company completed a private placement of 5.0 million shares of the Company. Other changes in shares outstanding were due to shares issued from treasury as a result of warrant, broker warrant and option exercises, vested DSU redemptions or RSU redemptions.

Related Party Transactions

At March 31, 2018, Messrs. Kenneth E. MacNeill (President and Chief Executive Officer) and George H. Read (Senior Vice President of Exploration and Development), through their respective consulting companies, hold management and consulting contracts with the Company. Messrs. MacNeill and Read's monthly fees during the quarter ended March 31, 2018 were \$20 thousand (2017 – \$29 thousand) and \$15 thousand (2017 – \$22 thousand), respectively. These reductions in 2018 are due to voluntary base compensation reductions for the Company's officers, employees and directors.

During the three-month period ended March 31, 2018, total compensation paid or payable to officers (including amounts paid through companies controlled by Messrs. MacNeill and Read) and to directors of the Company was \$206 thousand (2017 – \$299 thousand). Of these amounts, \$145 thousand (2017 – \$217 thousand) was included in administration expense and \$61 thousand was included in exploration and evaluation expense (2017 – \$82 thousand). Included in these amounts are share-based payment transactions of \$43 thousand (2017 – \$61 thousand).

The above transactions were in the normal course of operations and are measured at an amount agreed to by the related parties. The fair value of share-based payments in the form of options was determined using the Black-Scholes model. The fair value of share-based payments in the form of RSUs and DSUs was determined based on the five-day volume weighted average trading price of the Company's shares preceding the date of grant.

Liquidity

The Company does not currently operate any producing properties and, as such, is dependent upon the issuance of new equity to finance its ongoing obligations and advance its exploration and evaluation properties. Until the Company's surplus cash is required to fund exploration, evaluation and/or development activities it is invested in a variety of highly rated instruments.

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

At March 31, 2018 the Company had \$3.0 million (2017 – \$4.0 million) in cash and cash equivalents and short-term investments. The Company has also supplied \$0.6 million (2017 – \$0.6 million) of irrevocable standby letters of credit issued by a Canadian chartered bank. The Company backs the letters of credit with investments which have been recorded on the financial statements as restricted cash. The Company does not include restricted cash in its working capital when analyzing its liquidity requirements. As well, at March 31, 2018, the Company is required to spend \$1.1 million on qualifying expenditures by the end of 2018 to fulfill its obligations under its flow-through commitments.

Capital Resources and Outstanding Share Data

As at March 31, 2018 the Company had working capital of \$3.2 million compared to \$2.1 million at March 31, 2017. The Company believes it has sufficient liquidity to continue operations until further financing is arranged.

At March 31, 2018 the Company had 379,905,424 common shares, 388,200 DSUs, 1,513,332 RSUs, 10,144,100 options (weighted average exercise price of \$0.20), 18,536,111 warrants (weighted average exercise price of \$0.22) and 519,737 broker warrants (weighted average exercise price of \$0.20) issued.

As at May 3, 2018, the Company's issued and outstanding common shares increased from March 31, 2018 to 380,560,424 due to redemptions of 655,000 vested RSUs. RSUs outstanding at May 3, 2018 are 8,673,332 due to redemptions of 655,000 and grants of 7,815,000. Options at May 3, 2018 have increased from March 31, 2018 to 11,531,300 due to grants of 1,748,200 offset by expiries of 361,000. DSUs outstanding at May 3, 2018 increased from March 31, 2018 to 713,200 due to grants of 325,000. As at May 3, 2018, warrants and broker warrants remained unchanged from March 31, 2018.

Financial Instruments

As at March 31, 2018, the fair values of all of the Company's financial instruments approximates their carrying values. Certain financial instruments are exposed to the following financial risks:

Credit risk

Credit risk is the risk of an unexpected loss by the Company if a customer or third-party to a financial instrument fails to meet its contractual obligations. The Company considers this risk to be insignificant as the majority of the Company's cash and cash equivalents, short-term investments, and restricted cash are held by financial institutions with an A (low) credit rating or are invested in Government of Canada treasury bills which are backed by the Government of Canada. At March 31, 2018, the Company's credit risk relates to its cash and cash equivalents, short-term investments, receivables and restricted cash of \$3.8 million (December 31, 2017 – \$4.8 million).

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to forecast future cash flows to ensure that it will have sufficient liquidity to meet its obligations when due. To ensure the Company has sufficient cash on hand, the Company prepares annual capital and operating budgets which are regularly monitored and updated as considered necessary. As at March 31, 2018, the Company had working capital of \$3.2 million (excluding restricted cash) and is required to incur a further \$1.1 million of qualifying expenditures before December 31,

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

2018 as a result of the flow-through share financing in 2017. Given that cash flow from operations are negative, the Company is dependent on additional sources of financing beyond 2018.

As at March 31, 2018, the Company had guaranteed certain liabilities by issuing \$0.6 million (December 31, 2017 – \$0.6 million) of irrevocable standby letters of credit. The Company backs the letters of credit with investments which have been recorded on the financial statements as restricted cash. The Company does not include restricted cash in its working capital when analyzing its liquidity requirements. The guarantees as at March 31, 2018 relate to environmental rehabilitation provisions.

The Company may pursue options to finance the further exploration, evaluation and/or development of the Star – Orion South project as it currently does not have sufficient funds to bring any of its property interests into production from its own financial resources. Financing options may include joint venture arrangements, debt financing, equity financing or other means. Although the Company has been successful in the past in obtaining financing, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain additional financing could result in delay or indefinite postponement of further exploration, evaluation and/or development of its projects with the possible loss of such properties.

The Company currently does not have sufficient resources to finance operating activities beyond its 2018 fiscal year, conditions which raise material uncertainties which cast significant doubt about the Company's ability to continue as a going concern. At March 31, 2018, the Company had working capital of \$3.2 million, of which \$1.1 million is committed to be spent on qualifying expenditures before December 31, 2018. The ability of the Company to continue as a going concern and fund general and administrative expenses in an orderly manner will require further equity issues or other forms of financings beyond 2018. There is no assurance that the Company will be successful in obtaining required financing at an acceptable cost as and when needed or at all. Failure to obtain additional financing on a timely basis may cause the Company to postpone exploration and/or evaluation plans, forfeit rights in its properties or reduce or terminate its operations. The Company is assessing opportunities to address the issue of liquidity.

Market risk

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of four types of risk: foreign currency risk, interest rate risk, commodity price risk and equity price risk. As at March 31, 2018, the Company does not have significant exposure to any of these market risks. Equity price risk is the uncertainty associated with the valuation of assets arising from changes in equity markets. The Company is exposed to this risk through its equity holdings. The investment in the common shares of Wescan is monitored by management with decisions on sale taken to the Board level. A 10 percent decrease in the market price of Wescan would result in a \$41 thousand decrease in fair value.

Critical Accounting Estimates and Judgments

The financial statements for the period ended March 31, 2018 have been prepared in accordance with IFRS issued by the IASB. The Company's accounting policies are described in Note 4 to the financial statements for the year ended December 31, 2017. Certain of these policies involve critical accounting estimates as they require management to make particularly subjective or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts could be reported under different

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

conditions or using different assumptions. The uncertainties related to these areas could significantly impact the Company's results of operations, financial condition and cash flows.

In preparing the financial statements for the period ended March 31, 2018, significant judgments and estimations have been made by management in applying the Company's accounting policies. In particular, the significant areas of judgment and estimation uncertainty considered by management in preparing the consolidated financial statements are: joint control assessments, identification of cash generating units, exploration and evaluation expenditures, reserve and resource estimation, asset valuations and assessments for impairment, estimations for environmental rehabilitation provisions, contingent consideration, share-based payment transactions and recovery of deferred tax assets. These are discussed in more detail in Note 5 of the Company's financial statements for the year ended December 31, 2017.

A critical accounting estimate in determining the Company's financial results relates to the recoverability of the carried amounts of exploration and evaluation assets. Management assesses carrying values of these assets at each reporting date.

Accounting Changes

Accounting Changes during the period

IFRS 9 – Financial Instruments

On July 24, 2015 the IASB issued the final version of IFRS 9, bringing together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39, "Financial Instruments: Recognition and Measurement", and all previous versions of IFRS 9. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. IFRS 9 requires financial assets to be classified into three measurement categories: those measured at fair value through profit and loss ("FVPL"), those measured at fair value through other comprehensive income ("FVOCI") and those measured at amortized cost. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument.

Implementation:

Financial assets designated as available-for-sale at December 31, 2017 were comprised of the Company's investment in Wescan Goldfields Inc. ("Wescan"). IFRS 9 requires all equity investments to be measured at fair value. The default approach is for all changes in fair value to be recognized in profit or loss ("FVPL"). However, for equity investments that are not held for trading, entities can make an irrevocable election at initial recognition to classify the instruments as FVOCI, with all subsequent changes in fair value being recognized in other comprehensive income. This election is available for each separate investment. The Company did not make this election. The impact as a result of the application of IFRS 9 is an increase of \$290 thousand to accumulated deficit and a corresponding decrease to accumulated other comprehensive income.

IFRS 15 – Revenue from contracts with customers

IFRS 15 will replace IAS 11, "Construction Contracts" and IAS 18, "Revenue" and related interpretations effective for annual periods commencing on or after January 1, 2018. IFRS 15 introduces a new single revenue recognition model for contracts with customers and two approaches to recognizing revenue: at a point in time or over time.

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

Implementation:

All of the Company's property interests are currently in the exploration and evaluation stage and therefore do not generate sales revenue. The adoption of IFRS 15 did not have a material impact on the consolidated financial statements.

IFRS 2 – Share-Based Payments

In June 2016, the IASB issued amendments to IFRS 2. These amendments clarify how to account for certain share-based payment transactions, including accounting for cash-settled share-based payment transactions; accounting for share-based payment transactions with net settlement features; and accounting for modifications of share-based payment transactions from cash-settled to equity. IFRS 2 amendments are effective for annual periods beginning on or after January 1, 2018.

Implementation:

The amendments to IFRS 2 did not have a material impact on the consolidated financial statements.

There are no other IFRSs or International Financial Reporting Interpretations Committee ("IFRIC") interpretations that are not yet effective that would be expected to have a material impact on the Company.

Future Accounting Changes

IFRS 16 – Leases

IFRS 16 will replace IAS 17, "Leases" and related interpretations effective for annual periods commencing on or after January 1, 2019. Early application is permitted for companies that also apply IFRS 15. IFRS 16 follows a 'right-of-use' model which will require leases of more than twelve months to be reported on a company's financial statements as assets and liabilities, eliminating the current dual accounting model for lessees, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. The Company does not intend to early adopt IFRS 16 and has not yet fully evaluated the impact of this new standard however the impact is not expected to be material.

Disclosure Controls and Procedures

The Company has disclosure controls and procedures in place to provide reasonable assurance that any information required to be disclosed by the Company under securities legislation is recorded, processed, summarized and reported within the applicable time periods, and to ensure that required information is gathered and communicated to the Company's management so that decisions can be made about timely disclosure of that information. In accordance with the requirements of *National Instrument 52-109 Certification of Disclosure in Issuer's Annual and Interim Filings*, the Company's management, under the supervision and with the participation of the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), are responsible for establishing and maintaining disclosure controls and procedures and have caused these to be designed to provide reasonable assurance that material information is made known to management, particularly during the period in which these filings are being prepared; and information required to be disclosed is recorded, processed, summarized and reported within the time periods specified in securities legislation.

There have been no significant changes in the Company's disclosure controls during the quarter ended March 31, 2018.

Internal Controls over Financial Reporting Procedures

The Company's management is responsible for establishing and maintaining adequate internal controls over financial reporting. Any system of internal controls over financial reporting, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. In accordance with the requirements of *National Instrument 52-109 Certification of Disclosure in Issuer's Annual and Interim Filings*, the Company's management, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer and effected by the Company's board of directors, have designed the Company's internal controls over financial reporting as of the end of the period covered by these filings so that the internal controls over financial reporting provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS issued by the IASB and interpretations of the IFRIC.

There have been no significant changes to internal controls over financial reporting during the quarter ended March 31, 2018 that could have materially affected or are reasonably likely to materially affect the Company's internal controls over financial reporting.

Outlook

Following the drilling and the Revised Resource Estimate of 2015, the Company has taken a fresh look at the Project and has refined the mining and processing plans. The positive results of the recently announced PEA show that the Star and Orion South Kimberlites have the potential to be economically developed as a world class diamond mine.

The successful completion of the 2017 consolidation of the Company's Fort à la Corne mineral properties (including the Star - Orion South Diamond Project) and the concurrent earn-in arrangement with RTEC sets the stage for a new phase for the Company. It is the Company's view that Rio Tinto is one of the few companies in the world with the resources and expertise to move forward with a project of the magnitude of the Star - Orion South Diamond Project. The Company is also very pleased to have acquired the remaining portion of the Project from Newmont, while continuing to have Newmont as a significant shareholder.

As of May 3, 2018, the Company had approximately \$2.7 million in cash and cash equivalents and short-term investments (excluding \$0.6 million in restricted cash). A portion of the Company's cash and cash equivalents and short-term investments will be used for 2018 programs (including flow-through commitments) to further assess, evaluate and advance certain aspects of the Project, as well as for general corporate matters.

Risks and Uncertainties

The Company attempts to mitigate risks by identifying, assessing, reporting and managing risks of significance. The following are risks relating to the business of the Company. This information is a summary only of risks currently facing the Company based on its stage of development. Additional risks and uncertainties not presently known may also impact the Company's operations. Management's view on risks facing the Company will evolve as the Company's stage of development progresses.

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

Risks Associated With a Non-Producing Company

The principal risks faced by the Company involve: the Company's ability to obtain financing to further the exploration, evaluation and/or development of exploration and evaluation properties in which the Company holds interests; maintaining title to its property claims; obtaining the required permits from various federal, provincial and local governmental authorities; and the ultimate economic feasibility of any future development projects.

The further exploration, evaluation and/or development of exploration and evaluation properties in which the Company holds interests or which the Company acquires may depend upon the Company's ability to obtain financing through joint ventures, debt financing, equity financing or other means. The Company currently does not have sufficient funds to put any of its property interests into production from its own financial resources. There is no assurance that the Company will be successful in obtaining required financing as and when needed. Failure to obtain additional financing on a timely basis may cause the Company to postpone development plans, forfeit rights in its properties or joint operations or reduce or terminate its operations. Reduced liquidity or difficulty in obtaining future financing could have an adverse impact on the Company's future cash flows, results of operations and financial condition. The relative prices of diamonds and future expectations for such prices have a significant impact on the market sentiment for investment in diamond mining and exploration companies. To ensure that exploration and evaluation procedures are being performed effectively and those results are interpreted and reported in a proper manner, management ensures that qualified individuals, service providers and external consultants are utilized in the verification and quality assurance of analytical results.

Title disputes could have adverse consequences to the Company. Managing these issues is an integral part of exploration, development and mining in Canada and the Company is committed to managing these issues effectively. The Company has diligently investigated title to its claims. However, no assurance can be given that title to these properties will not be challenged or impugned in the future by third parties or governments. Management maintains a database to monitor the status of the Company's claims to ensure all claims are in good standing.

The current or future operations of the Company, including development activities and commencement of production on its properties, require permits from various federal, provincial and local governmental authorities. Failure to comply with applicable laws, regulations, and permitting requirements may result in permits not being granted or enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. To the best of the Company's knowledge, it is operating in compliance with all applicable rules and regulations. In addition, application for permits that will be required for the construction and operation of the proposed Project will be made following provincial and federal Ministerial approval upon conclusion of the Environmental Impact Assessment ("EIA"). While the majority of permits will be required from provincial authorities, permits required from the federal government include authorization from the Department of Fisheries and Oceans to allow anticipated changes to fish and fish habitat, permits from Natural Resources Canada for the explosives storage site and authorizations from Environment Canada and Transport Canada. The Company utilizes qualified individuals, service providers and external consultants and maintains constant communications with governmental authorities to ensure that the Company is or, in the case of the EIA, will be in compliance with all applicable rules and regulations.

MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

For the three months ended March 31, 2018

All of the Company's property interests are currently in the exploration stage. The exploration, development and production of precious metals and gems are capital-intensive, subject to the normal risks and capital expenditure requirements associated with mining operations. While the rewards can be substantial if commercial quantities of minerals or gems are found, there can be no assurance that the Company's past or future exploration efforts will be successful, that any production therefrom will be obtained or continued, or that any such production which is attempted will be profitable.

Technical Information

All technical information in this report has been prepared under the supervision of George Read, Senior Vice President of Exploration and Development, Professional Geoscientist in the Provinces of Saskatchewan and British Columbia and Mark Shimell, Project Manager, Professional Geoscientist in the Province of Saskatchewan, who are the Company's "Qualified Persons" under the definition of NI 43-101.

Caution regarding Forward-looking Statements

This MD&A contains forward-looking statements within the meaning of certain securities laws, including the "safe harbour" provisions of Canadian securities legislation and the United States Private Securities Litigation Reform Act of 1995. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," and words and expressions of similar import are intended to identify forward-looking statements, and, in particular, statements regarding the Company's future operations, future exploration and development activities or other development plans contain forward-looking statements. Forward-looking statements in this MD&A include, but are not limited to, disclosure regarding the economics and project parameters presented in the PEA, including, without limitation, IRR, NPV and other costs and economic information, carats of diamonds to be recovered, pre-tax payback period, tonnes of kimberlite to be mined, carats per tonne to be recovered (grade), diamond prices, life of mine, capital costs, length of pre-production period; statements related to mineral resources and/or reserves; statements related to the approval of the development of the Star - Orion South Diamond Project; statements relating to future development of the Star - Orion South Diamond Project and associated timelines; the environmental assessment and permitting process; the Company's intention to seek additional financing in the ensuing years; statements with respect to geotechnical investigations, assessments and test work; the proposed sampling program; the Company and RTEC's objectives for the ensuing year.

These forward-looking statements are based on the Company's current beliefs as well as assumptions made by and information currently available to it and involve inherent risks and uncertainties, both general and specific. Risks exist that forward-looking statements will not be achieved due to a number of factors including, but not limited to, developments in world diamond markets, changes in diamond valuations, risks relating to fluctuations in the Canadian dollar and other currencies relative to the US dollar, changes in exploration, development or mining plans due to exploration results and changing budget priorities of the Company or its earn-in and/or joint venture partners, the effects of competition in the markets in which the Company operates, the impact of changes in the laws and regulations regulating mining exploration and development, judicial or regulatory judgments and legal proceedings, operational and infrastructure risks and the additional risks described in the Company's most recently filed Annual Information Form, annual and interim MD&A, news releases and technical reports. The Company's anticipation of and success in managing the foregoing risks could cause actual results to differ materially from what is anticipated in such forward-looking statements.

Although management considers the assumptions contained in forward-looking statements to be reasonable based on information currently available to it, those assumptions may prove to be incorrect. When making decisions with respect to the Company, investors and others should not place undue reliance on these statements and should carefully consider the foregoing factors and other uncertainties and potential events. Unless required by applicable securities law, the Company does not undertake to update any forward-looking statement that may be made.

STAR DIAMOND CORPORATION

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended March 31, 2018

(In thousands of Canadian dollars except as otherwise noted)

1. Corporate Information

Star Diamond Corporation (the "Company") was incorporated under the Canada Business Corporations Act on April 29, 1985 and its shares are publicly traded on the Toronto Stock Exchange. On February 6, 2018, the Company amended its articles of incorporation to change its corporate name from Shore Gold Inc. to Star Diamond Corporation. The principal activities of the Company are the exploration, development and production of diamonds. The Company is located at 300 – 224 4th Avenue South, Saskatoon, Saskatchewan, Canada.

2. Basis of preparation

The condensed interim consolidated financial statements of the Company for the three months ended March 31, 2018 were authorized for issue by the Company's Audit Committee on May 3, 2018. The condensed interim consolidated financial statements of the Company and all its subsidiaries have been prepared in accordance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* and do not include all of the information required for full annual financial statements. The Company's financial statements have been prepared on a historical cost basis, except as disclosed, using the Company's functional currency of Canadian dollars.

In preparing the financial statements for the period ended March 31, 2018, significant judgments and estimations have been made by management in applying the Company's accounting policies. In particular, the significant areas of judgment and estimation uncertainty considered by management in preparing the consolidated financial statements are: joint control assessments, identification of cash generating units, exploration and evaluation expenditures, reserve and resource estimation, asset valuations and assessments for impairment, estimations for environmental rehabilitation provisions, share-based payment transactions and recovery of deferred tax assets. These are discussed in more detail in note 5 of the Company's consolidated financial statements for the year ended December 31, 2017.

3. Going Concern

These financial statements are prepared on the assumption that the Company will continue as a going concern and realize its assets and discharge its liabilities and commitments in the normal course of business. Management is aware, in making its going concern assessment, of material uncertainties related to events and conditions that cast significant doubt upon the Company's ability to continue as a going concern. At March 31, 2018, the Company had working capital of \$3.2 million, of which \$1.1 million is committed to be spent on qualifying exploration expenditures before December 31, 2018, leaving \$2.1 million to finance operating activities through its 2018 fiscal year. The ability of the Company to continue as a going concern and fund general and administrative expenses in an orderly manner will require further equity issues or other forms of financings beyond 2018. There is no assurance that the Company will be successful in obtaining required financing at an acceptable cost as and when needed or at all. Failure to obtain additional financing on a timely basis may cause the Company to postpone exploration and/or evaluation plans, forfeit rights in its properties or reduce or terminate its operations.

These financial statements do not include any adjustments to carrying values of assets and liabilities, reported expense and the statement of financial position classifications used, that would be necessary if the going concern assumption were not appropriate.

4. Summary of significant accounting policies

The accounting policies applied by the Company in these condensed interim consolidated financial statements are the same as those disclosed in note 4 of the Company's consolidated financial statements for the year ended December 31, 2017. Accordingly, the condensed interim consolidated financial statements should be read in conjunction with the consolidated financial statements for the year ended December 31, 2017.

5. IFRS standards, amendments and interpretations

(a) New IFRS standards, amendments and interpretations effective during the period

At the date of authorization of these consolidated financial statements, the IASB has issued the following new standards which became effective for the reporting period.

i. IFRS 9 – Financial Instruments

On July 24, 2015 the IASB issued the final version of IFRS 9, bringing together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39, "Financial Instruments: Recognition and Measurement", and all previous versions of IFRS 9. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. IFRS 9 requires financial assets to be classified into three measurement categories: those measured at fair value through profit and loss ("FVPL"), those measured at fair value through other comprehensive income ("FVOCI") and those measured at amortized cost. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument.

Implementation:

Financial assets designated as available-for-sale at December 31, 2017 were comprised of the Company's investment in Wescan Goldfields Inc. ("Wescan"). IFRS 9 requires all equity investments to be measured at fair value. The default approach is for all changes in fair value to be recognized in profit or loss ("FVPL"). However, for equity investments that are not held for trading, entities can make an irrevocable election at initial recognition to classify the instruments as FVOCI, with all subsequent changes in fair value being recognized in other comprehensive income. This election is available for each separate investment. The Company did not make this election. The impact as a result of the application of IFRS 9 is an increase of \$290 thousand to accumulated deficit and a corresponding decrease to accumulated other comprehensive income.

ii. IFRS 15 – Revenue from contracts with customers

IFRS 15 will replace IAS 11, "Construction Contracts" and IAS 18, "Revenue" and related interpretations effective for annual periods commencing on or after January 1, 2018. IFRS 15 introduces a new single revenue recognition model for contracts with customers and two approaches to recognizing revenue: at a point in time or over time.

Implementation:

All of the Company's property interests are currently in the exploration and evaluation stage and therefore do not generate sales revenue. The adoption of IFRS 15 did not have a material impact on the consolidated financial statements.

iii. IFRS 2 – Share-Based Payments

In June 2017, the IASB issued amendments to IFRS 2. These amendments clarify how to account for certain share-based payment transactions, including accounting for cash-settled share-based payment transactions; accounting for share-based payment transactions with net settlement features; and accounting for modifications of share-based payment transactions from cash-settled to equity. IFRS 2 amendments are effective for annual periods beginning on or after January 1, 2018.

Implementation:

The amendments to IFRS 2 did not have a material impact on the consolidated financial statements.

(b) IFRS standards, amendments and interpretations issued but not yet effective

i. IFRS 16 – Leases

IFRS 16 will replace IAS 17, “Leases” and related interpretations effective for annual periods commencing on or after January 1, 2019. Early application is permitted for companies that also apply IFRS 15. IFRS 16 follows a ‘right-of-use’ model which will require leases of more than twelve months to be reported on a company’s financial statements as assets and liabilities, eliminating the current dual accounting model for lessees, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. The Company does not intend to early adopt IFRS 16 and has not yet fully evaluated the impact of this new standard however the impact is not expected to be material.

At the date of authorization of these consolidated financial statements, the IASB has issued the following new standards which is not yet effective for the relevant reporting periods.

There are no other IFRSs or IFRIC interpretations that have been issued and are not yet effective that would be expected to have a material impact on the Company.

6. Restricted Cash

At March 31, 2018, the Company has pledged \$622 thousand (December 31, 2017 – \$622 thousand) in short-term investments as security for letters of credit provided, which relate to the provision for decommissioning and rehabilitation. These short-term investments are recorded as restricted cash.

7. Investment in Wescan Goldfields Inc.

At March 31, 2018, the Company held 5,806,634 shares or 13.1% (December 31, 2017 – 5,806,634 shares) of Wescan Goldfields Inc. (“Wescan”), a publicly traded company on the TSX Venture exchange. The Company considers certain judgments and assumptions when assessing whether significant influence exists over its investments. This includes an assessment of the Company’s ability to participate in financial and operating policy decisions of the investee. The existence and effect of potential voting rights held by the investor or other entities were also considered. IFRS 9 requires all equity investments to be measured at fair value. Changes in fair value are recognized in profit or loss (“FVPL”). The impact as a result of the application of IFRS 9 is an increase of \$290 thousand to accumulated deficit and a corresponding decrease to accumulated other comprehensive income.

At March 31, 2018, the carrying value of this investment was \$406 thousand (December 31, 2017 – \$348 thousand). During the quarter ended March 31, 2018, the Company recognized a \$58 thousand increase in the carrying value of its investment in Wescan.

8. Exploration and evaluation assets

Exploration and evaluation assets are made up of the following:

	Fort à la Corne properties (a)
Balance – December 31, 2016	\$ -
Newmont Acquisition – June 22, 2017	21,862
Partial reversal of prior impairments	44,482
Balance – December 31, 2017 and March 31, 2018	\$ 66,344

(a) Fort à la Corne properties

As of March 31, 2018, the Company holds a 100% interest in the Fort à la Corne properties located in the central part of Saskatchewan, Canada. These properties are accounted for as one CGU.

During the quarter ended June 30, 2017, the Company acquired (the "Newmont Acquisition") from Newmont Canada FN Holdings ULC ("Newmont") all of Newmont's participating interest in the Fort à la Corne joint venture (the "FaC JV"), resulting in the Company owning 100% of the Fort à la Corne properties, and concurrently entered into an Option to Joint Venture Agreement (the "Option Agreement") with Rio Tinto Exploration Canada Inc. ("RTEC") pursuant to which the Company has granted RTEC an option to earn up to a 60% interest in the Fort à la Corne properties on the terms and conditions contained in the Option Agreement. The Newmont Acquisition was completed pursuant to a Participating Interest Purchase Agreement effective as of June 22, 2017 between the Company, its wholly owned subsidiary, Kensington Resources Ltd. ("Kensington"), and Newmont whereby Newmont sold its entire interest in the FaC JV to the Company in consideration for 53,764 thousand common shares of the Company, 1,105 thousand common share purchase warrants and a contingent payment as described below. As additional consideration for Newmont's interest in the FaC JV, the Company has agreed to grant Newmont a participation right to subscribe for and purchase such number of common shares in order to maintain its proportionate interest in the share capital of the Company; Newmont may exercise this right each time the Company undertakes financing (subject to certain exemptions) at the same price and terms as the financing. Prior to the completion of the Newmont Acquisition, the Company held a 69 percent interest in the FaC JV and Newmont had a 31 percent interest. Immediately after the closing of the Newmont Acquisition and issuance of common shares, Newmont held approximately 19.9% of the common shares issued and outstanding on a non-diluted basis. Following the Newmont Acquisition, Kensington transferred its interest in the FaC JV to the Company and thereafter, the FaC JV was terminated.

The Company has also agreed that Newmont will receive a contingent payment in the aggregate amount of \$3,200 thousand if a positive decision is made to develop a mine on the Project. The Company, in its sole discretion (subject to regulatory approvals), may satisfy the contingent payment due to Newmont through a cash payment or the issuance of common shares. An estimate of the discounted present value of this contingent consideration was performed by management, using a risk-free discount rate that reflects current market assessments of the time value of money and probability weighted cash flows. This was determined to be \$730 thousand.

The carrying value of the Fort à la Corne properties represents the acquisition of minority interests of the Fort à la Corne properties since 2005, net of impairments. The decline in the Company's share price during 2011 resulted in the Company's market capitalization at December 31, 2011 being substantially less than the carrying value of the Company's net assets. Due to the existence of this indicator of impairment, the Company was required to assess the exploration and evaluation assets for impairment by comparing the carrying value of these assets to estimated discounted future cash flows. Due to the uncertainty surrounding project financing, the Company was unable to determine a reliable weighted average cost of capital to perform this assessment. As a result, the Company wrote down the carrying value of the Fort à la Corne properties to nil at December 31, 2011. Based on the recent transaction with Newmont, the Company performed an assessment of the estimated recoverable amount of the Fort à la Corne properties. As a result, the carrying value of the Fort à la Corne properties was determined to be \$66,344 thousand.

9. Exploration and evaluation expense

The Company's exploration and evaluation expense for the three months ended March 31, is comprised of the following:

	March 31, 2018	March 31, 2017
Fort à la Corne properties		
Amortization of tangible assets	\$ 8	\$ 15
Exploration and evaluation	385	398
Share-based payments	25	25
Buffalo Hills property		
Exploration and evaluation	-	-
Total	\$ 418	\$ 438

10. Share capital and reserves

Authorized

The authorized share capital of the Company consists of unlimited common shares with no par value.

The common shares of the Company are entitled to dividends pro-rated when declared by the Board of Directors and to one vote per share at meetings of the shareholders of the Company. Upon dissolution or any other distribution of assets, the shareholders are entitled to receive a pro-rata share of such distribution.

Common shares issued and fully paid:

	Common Shares (in thousands)	Amount (in thousands)
Balance – December 31, 2017	378,276	\$ 834,895
Restricted Share Units redeemed	1,242	248
Deferred Share Units redeemed	388	75
Balance – March 31, 2018	379,906	\$ 835,218

Broker warrants reserve

On certain issues of common shares, the Company issued broker warrants as partial consideration to the agent for services associated with the share issuance. Each broker warrant entitles the agent to acquire one common share of the Company for a period of 12 to 24 months after closing. The broker warrant reserve is used to recognize the fair value of outstanding warrants. If the broker warrant is exercised or expires the fair value is transferred to share capital or contributed surplus, respectively.

Warrant reserve

On certain issues of common shares, the Company has issued warrants with the common shares entitling the holder to acquire additional common shares of the Company. The warrant reserve is used to recognize the fair value of outstanding warrants. If the warrant is exercised or expires the fair value is transferred to share capital or contributed surplus, respectively. A summary of the outstanding warrants is as follows:

	Warrants (in thousands)	Average Price	Amount (in thousands)
Balance – December 31, 2017	23,536	\$ 0.224	\$ 1,061
Expired March 21, 2018	(5,000)	0.25	(258)
Balance – March 31, 2018	18,536	\$ 0.217	\$ 803

11. Share-based payments

(a) Share option plan

The Company has established a share option plan whereby options may be granted to directors, officers, employees and service providers to purchase common shares of the Company. Options granted have an exercise price of not less than the closing price quoted on the Toronto Stock Exchange for the common shares of the Company on the trading day prior to the date on which the option is granted. Certain options vest immediately while others vest six to twelve months after grant date and all options granted under the plan expire five years from the date of the grant of the options. All options are to be settled by physical delivery of shares. These common shares would be issued from the same 10% rolling pool as the common shares issued under the Company's Deferred Share Unit Plan and the Company's Performance Share Unit and Restricted Share Unit Plan.

During the quarters ended March 31, 2018 and 2017, no options were granted. Options outstanding at March 31, 2018 are 10,144 thousand (2017 – 9,203 thousand). The options outstanding at March 31, 2018 have an exercise price in the range of \$0.16 to \$0.28 (2017 – \$0.16 to \$0.28) and a weighted average

contractual life of 2.1 years (2017 – 2.6 years). The options expire between the dates of April 2018 to September 2022.

The expense related to the Company's share-based payments as a result of certain options vesting over the period is recognized in the comprehensive statement of loss for the three months ended March 31, as presented are as follows:

Expense Category included	March 31, 2018	March 31, 2017
Administration	\$ 1	\$ 1
Exploration and evaluation	4	3
Total	\$ 5	\$ 4

The grant date fair value of stock options issued under the plan is estimated using the Black-Scholes option-pricing model. Expected volatility is estimated by considering historic average share price volatility. The option life is estimated based on the weighted average historical life of options that have been granted by the Company.

(b) Deferred share unit plan

The Company has established a deferred share unit plan (the "DSU Plan"), which provides for the grant of deferred share units ("DSUs") to eligible directors of the Company. The DSUs provide for the cash payment of certain amounts, or the issuance of common shares, to eligible directors. The Company does not intend to make cash payments and there is no history of the Company making cash payments under the DSU plan and, as such, the DSUs are accounted for within shareholders' equity. These common shares would be issued from the same 10% rolling pool as the common shares issued under the Company's Performance Share Unit and Restricted Share Unit Plan and the Company's Share Option Plan. As these DSUs are expected to be settled with equity, an amount equal to the stock-based compensation expense is initially credited to contributed surplus and transferred to share capital if and when the deferred share unit is redeemed. DSUs vest immediately.

During the quarters ended March 31, 2018 and 2017, no DSUs were granted. DSU movements (in thousands) during the three months ended March 31 are as follows:

	March 31, 2018	March 31, 2017
Outstanding – January 1	776	642
Redeemed for common shares from treasury	(388)	(129)
Outstanding – March 31	388	513

(c) Performance share unit and restricted share unit plan

The Company has established a performance share unit and restricted share unit plan (the "Unit Plan"), which provides for the grant of performance share units ("PSUs") and restricted share units ("RSUs") to eligible officers and employees of the Company. Upon redemption, the vested PSUs and/or the RSUs provide for the cash payment of certain amounts, or the issuance of common shares, to the participants. The Company does not intend to make cash payments and there is no history of the Company making cash payments under the Unit plan and, as such, the PSUs and RSUs are accounted for within shareholders' equity. These common shares would be issued from the same 10% rolling pool as the common shares issued under the Company's Deferred Share Unit Plan and the Company's Share Option Plan. As PSUs and RSUs are expected to be settled with equity, an amount equal to compensation expense is initially credited to contributed surplus, recognized over the term of the vesting period, and transferred to share capital if and when the units are exercised. RSUs vest in three tranches, with all RSUs vesting no later than the third anniversary from the date of grant.

During the quarters ended March 31, 2018 and 2017, no PSUs or RSUs were granted. RSU movements (in thousands) during the three months ended March 31 are as follows:

	March 31, 2018	March 31, 2017
Outstanding – January 1	2,755	4,100
Redeemed for common shares from treasury	(1,242)	(1,242)
Outstanding – March 31	1,513	2,858

The expense related to the Company's share-based payments as a result of RSUs vesting over the period is recognized in the comprehensive statement of loss for quarter ended March 31, as presented as follows:

Expense category included	March 31, 2018	March 31, 2017
Administration	\$ 33	\$ 50
Exploration and evaluation	21	26
Total	\$ 54	\$ 76

12. Related party transactions

Related party transactions with key management personnel

The Company pays certain of its key management personnel through companies owned by certain executive officers and directors. Those companies are as follows:

MacNeill Brothers Oil and Gas Ltd.

George Read Consulting Inc.

Compensation of key management personnel and directors, including payments made or payable to related parties owned by executive officers and directors is as follows:

	March 31, 2018	March 31, 2017
Short-term benefits to key management and directors	\$ 55	\$ 85
Consulting and management fees to related companies	108	154
Share based payments	43	60
Total compensation paid to key management personnel and directors	\$ 206	\$ 299

The amounts disclosed in the table are the amounts recognized as an expense during the reporting period related to key management personnel and directors. The above transactions were in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties. The fair value of share-based payments was determined using the Black-Scholes model. The fair value of share-based payments in the form of RSUs and DSUs was determined based on the five-day volume weighted average trading price of the Company's shares preceding the date of grant.

The compensation paid or payable to key management personnel and directors are included in the Company's statement of comprehensive loss as follows:

	March 31, 2018	March 31, 2017
Administration	\$ 145	\$ 217
Exploration and evaluation	61	82
Total compensation paid to key management personnel and directors	\$ 206	\$ 299

13. Financial instruments

Fair values have been determined for measurement and/or disclosure purposes based on the fair value hierarchy for financial instruments that require fair value measurement after initial recognition. The classification of each financial instrument is described in note 4 of the Company's consolidated financial statements for the year ended December 31, 2017.

The carrying amounts for cash and cash equivalents, short-term investments, receivables, restricted cash and trade payables approximate their fair value due to the short-term nature of these instruments. These financial instruments are carried at amortized costs.

All financial instruments measured at fair value are categorized into one of three hierarchy levels as described in note 20 of the Company's consolidated financial statements for the year ended December 31, 2017. These financial instruments include the Company's investment in Wescan. The fair value of the Company's investment in Wescan is based on quoted prices in active markets (level 1).

Risk management

Certain financial instruments are exposed to the following financial risks:

(a) Credit risk

Credit risk is the risk of an unexpected loss by the Company if a customer or third-party to a financial instrument fails to meet its contractual obligations. The Company considers this risk to be insignificant as the majority of the Company's cash and cash equivalents, short-term investments, and restricted cash are held by financial institutions with an A (low) credit rating or are invested in Government of Canada treasury bills which are backed by the Government of Canada. At March 31, 2018, the Company's credit risk relates to its cash and cash equivalents, short-term investments, receivables and restricted cash of \$3.8 million (December 31, 2017 – \$4.8 million).

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity risk is to forecast future cash flows to ensure that it will have sufficient liquidity to meet its obligations when due. To ensure the Company has sufficient cash on hand, the Company prepares annual capital and operating budgets which are regularly monitored and updated as considered necessary. As at March 31, 2018, the Company had working capital of \$3.2 million and is required to incur a further \$1.1 million of qualifying expenditures before December 31, 2018 as a result of the flow-through share financing discussed in note 16 of the Company's consolidated financial statements for the year ended December 31, 2017. Given that cash flow from operations are negative, the Company is dependent on additional sources of financing beyond 2018.

As at March 31, 2018, the Company had guaranteed certain liabilities by issuing \$622 thousand (December 31, 2017 – \$622 thousand) of irrevocable standby letters of credit. The Company backs the letters of credit with investments which have been recorded on the financial statements as restricted cash. The Company does not include restricted cash in its working capital when analyzing its liquidity requirements. The majority of the guarantees at March 31, 2018 relate to environmental rehabilitation provisions.

The Company may pursue options to finance the further exploration, evaluation and/or development of the Star – Orion South project as it currently does not have sufficient funds to bring any of its property interests into production from its own financial resources. Financing options may include joint venture arrangements, debt financing, equity financing or other means. Although the Company has been successful in the past in obtaining financing, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain additional financing could result in delay or indefinite postponement of further exploration, evaluation and/or development of its projects with the possible loss of such properties.

The Company currently does not have sufficient resources to finance operating activities beyond its 2018 fiscal year, conditions which raise material uncertainties which cast significant doubt about the Company's ability to continue as a going concern. The Company is assessing opportunities to address the issue of liquidity.

(c) Market risk

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of four types of risk: foreign currency risk, interest rate risk, commodity price risk and equity price risk. As at March 31, 2018, the Company does not have significant exposure to any of these market risks.
